MORE
PORK

To draw the Morepork you must find
The branch he's settled on to perch
All day, so to elude your search.
A full-face study is the kind

Of sketch to make. You'll never know
About his profile. If you move
To right or left, he'll quickly prove
He's watching you. His head will go

Round (not his body) till you'd say
His neck was 'screwed.' There he will be
Fixed, staring. If you stay, you'll see
Those big eyes till the dark'ning day.
